BIG NEW MEXICAN MINE DEAL

S6,000,000 SYNDICATE COMBINES

MANY PROPERTIES.

Rich Freak Strike in Gold Circle, Nevada

Tonopph Maintains Buillon Record

Pioneer Mentana Guiches Fromise to
Pay Again—Mexican and Aisskan News

Silver City, July 28.—A big mining deal
has just been concluded in this city by which
the consolidated mining interests in the
Mogollon district have been taken over by a
syndicate of New York capitalists. The
Little Fannie group, the Consolidated group,
the Eberle properties and a number of other
claims were included in the sale. Hotchkies

B Barber, attorneys; James E. Nichols
of Austin, Nichols & Co., and William Childs,
Jr., a hotel man of New York city; Morgan
Davis, Jr., of Beranton, Pa., and others are
in the syndicate. The properties will be
known as the Socorro Mining Company,
capitalized at \$5,000,000, divided into \$6,000
shares of \$100 each. The deeds were taken
over by the Standard Trust Company of
New York from the Bliver City National
Bank.

NEVADA.

GOLDFIELD, July 28.—Ore said to rival the
best product of the Florence lease has been
uncovered on the 300 level of the Combination for the Alena and thirty, has mine in the Corbin district belonging to
the Helena and Livingston Smielting and
Reduction Company, has made the second
Reduction Company, has

GOLDFIELD, July 28.—Ore said to rival the best product of the Florence lease has been uncovered on the 300 level of the Combination Fraction. Three feet of quartz has

ounces of gold to the ton.

There are now 1,300 men employed in the camp by members of the Mine Operators' Association and 300 employed by non-members. The number, it is believed, will be increased by 500 by the end of the year. The payroll for the mines and mills in June

mounted to \$215,000.
TONOPAH, July 22.—The Tonopah Mining Company's 100 stamp mill broke its records in June for the production of builton and concentrates. The returns for the month totalled \$293,235, the product from a little less than 14,000 tons of ore. The average extraction was between 88 and 90 per cent.
RHYOLITE, July 22.—Nine bricks, weighing approximately 11,000 ounces troy were shipped recently to the Selby smelter by the Mont-

gomery Shoshone Consolidated Mining Com-pany. The bullion is worth about \$3 an ounce making the shipment worth \$33,000. In, addition to this bullion, which represented the cleanup of the zinc precipitates for June, about thirty-five tons of concentrates were saved by the tables. This product is said to run several hundred dollars to the ton. The output for June is stated by General Super-intendent J. C. Kirchen to have been up to

the average.

GOLD CIRCLE, July 27.—In the Eastern Star a strike of sensationally high grade ore was made last week. The find is regarded as a freak. It is described as ribbon quartz associated with jasperoids, carrying ribbons associated with Jasperoids, carrying rispons of almost pure gold. One sample ran \$400,000 to the ton. This was the result of an assay on a little formation in the centre of a piece of broken down ore. The best samples obtained elsewhere in the strike was \$11,600 on the Log Cabin group in the same section two feet of ore, averaging \$40 in value, has been opened at a depth of twelve feet. The been opened at a depth of twelve feet. The Golden Arrow at a depth of aix feet has eight feet of \$14 ore. The Fetohew lesse on the Poorman claim has a three inch vein which gives assay returns of \$3,000 to the ton. The shaft of the Schenck lesse on the Colorado Grandees is in high grade at a depth of thirty feet, with fourteen inches on the foot wall carrying \$116. The Jurgens & Gebhardt lesse on the extension of the Gold Crown has its entire shaft in \$28 ore, with a streak on the hanging wall said to carry values of \$1,500 to the ton. The Queen is sacking \$300 ore. The Rex has crosscut fourteen feet of ore which averages \$22 a ton, and it is said that the work of the lest two months has opened \$60,000 tons of this quality.

MONTANA.

has opened 50,000 tons of this quality.

MONTANA.

BUTTE, July 29.—John D. Ryan, managing director of the Amalgamated Copper Company. Says. that company has no copper on hand. The metal market is in a healthy if not a prosperous condition, he says. We have been selling at a lower price than we would like to set, and I can't say when it will be bester. The price of ceppes will depend on general conditions. Any recovery in the business of the country will communicate itself to the copper indu stry, because there are no stocks of metal in the hands of American manufacturers. Any revival of the manufacturing business will create a good demand for copper and will advance prices.

Of mining conditions as he found them in Montana on his return from the East Mr. Ryan said: "With the exception of conditions incident to the lesses say flood at the Great Falls smelter everything pertaining to the copper industry is satisfactory. The smelterswill be repaired and started up within afour or five weeks. The mines of Butte are bloing as well as can be expected. The output of the properties is as large as at any time in the history of the companies, and the cost of production is as low.

A firm of Chicago brokers is conducting the effort to reorganize the North Butte Extension Mining Company, the directors of the company having decided to offer for immediate sale \$75,000 in notes in denominations of \$500, \$1,000 and \$5,000, payable on or before six, nine or twelve months from date, the proceeds to be used in liquidating the company's indebtedness, which aggregated \$60,000 on July 1. Of that amount \$37,000 is due on the Overman claim, \$15,000 in bills receivable, and \$5,000, payable on or before six, nine or twelve months from date, the proceeds to be used in liquidating the company's indebtedness, which aggregated \$60,000 on 51,000 and \$5,000, payable on or before six, nine or twelve months from date, the proceeds to be used in liquidating the company's indebtedness, which aggregated \$60,000 or \$500,000, for the purpose of taki

returns have been in excess of the expenses, and in June there was a net profit of about \$5,000.

The Washoe smelter is breaking all records in copper production and is treating all the ore usually received under normal conditions in addition to about 40 per cent. of the output of the Boston and Montana mines. The copper production is at a rate of nearly \$2,000,000 pounds a month. To this total the North Butte Mining Company contributed something more than 4,000,000 pounds, and Butte Coalition in excess of 2,500,000 pounds on its present limited output. The remainder, about 13,500,000 pounds, is credited to the Anaconda, Boston and Montana, Butte and Boston, Washoe, Trenton and Parrot Company, and to a very little custom ore. HELENA, July 29.—The Mutual Mining and Milling Company, of which Helena residents are the principal stockholders, has made a splendid strike in its property at the head of the Jefferson, Madison and McClellan gulches. All three of these gulches were among the famous gold producers of early day placer mining, and it is the belief of the owners of the property that they have discovered the main lode of these streams. The vein, which is of a blankety character, contains a paying streak about fourteen inches wide and assays on an average more than \$10 a ton, including \$2 in silver.

Articles of incorporation of the Copper Mountain Mining and Developing Company, Limited, of Mullan, Idaho, with a capital stock of \$150,000, has been filed with the Secretary of State. The company is the owner of the Parl, Copper Creek, Walter and other properties in Sanders county, this State, which are regarded as having a most promising future.

The St. Louis Mining and Milling Company, whose suit with the Mexicone.

St. Louis Mining and Milling Com-hose suit with the Montana Company-in ground lying between the proper-se been the most important litiga-Montana, is preparing to resume mis near Maryswille. Diggest strike of recent years in the life district is reported in the Gleason of the Bellboy mine. A six foot high grade galena ore was uncovered. of high grade galena ore was uncovered e syndicate of Philadelphia and Mon capitalists, headed by M. L. Hewitt

## MINE PUMPS.

STATION AND SINKING MINING PUMPS.
THE SLOGAN OF THE CAMERON—
THE SLOGAN CAMERON PUMPS IN daily satisfiery use all over the world give taugible proof taker merit and confirm the claim for their reliably over all others. They are conceded to the most durshie, reliable and effective mining mps on the market to-day, and while often imited are never equalited. For proof, inquire of mining engineer, for the latest catalog "O" mining engineer, for the latest catalog "O" relices, write any of our resident agents or ect to the

COLORADO. SPRINOS, July 29.—The Mary McKinney Mining Company of Cripple Creek produced 7,235 tons of ore in the year ended June 30. The gross value was \$133,—265.55. The net profits were \$41,142.61. Lessees during the year output 3,851 tons; worth gross, \$85, \$70.35. Of this sum the company received in royalties \$11,30.118. At the annual meeting the old officers were reclected. Boston capitalists operating on the Little Chant, in Pony Gulch, Cripple Creek, have cut a three foot vein of milling ore at 40 feet depth and are developing it. The ore is highly oxidized and is suitable for cyaniding. The Little Giant mill will probably treat the product.

The Western Investment Company, which recently leased the holdings of the Mary McKinney Mining Company on Raven Hill. Cripple Creek, will sink a shart to water level and resume shipments.

Bhipments have been outreal Mining and Milling Company. Ceppile Creek. The mine has been output in the produced of the produced of the ore carries is to \$20 at 100 and is oxidized sufficiently for good milling. No other Copper Mountain property active.

The Pharmacist mine, Cripple Creek, is in \$100 ore at 10s feet depth, in a three foot vein. William, Ash is reported to have made a rich strike of graphite ore, 60 per cent. pure, between Grape and Texas creeks. The vein, eight inches wide, is continuous.

The wano cyanide mill is again treating ores after a two weeks shut down for repairs. The mill turns out \$10,000 worth of buillon monthly, the per cent. of extraction approximating \$5. The mill wans first to show that Beulder county telluride ore could be treated by cyanidation.

July promises to be the banner month for 1900 production at Central City, Col. Shipments are heavy from old mines. The Evergreen mill has not yet started, but the Fifty mill at Black Hawk and other mills and smelter ser busy.

The Huby mine, Cripple Creek, at 1,256 feet depth, is in a fine grande or could be treated by cyanidation.

July promises to be the banner month for 1900 production at Central City,

widehed from 18 inches to 5 feet and retains its heavy gold bearing characteristics. The second Republican vein is being drifted on in Engineer Mountain.

Col. F. S. Mallory, president of the Neosho Mining Company, will bring a party of New Yerk capitalists to inspect the property about August 1. A party of Pittsburg, Pa., capitalists are expected to inspect next week the property of the Hall Tunnel and Missing Company, near Georgetown, Col.

The Nulph lease on the fifth level of the Santiago mine, East Argentine district, is in a 3 foot ore body carrying \$93 values in gold, silver and lead, with 15 to 18 per cent. copper. The ground has been opened 100 feet, with the shoot continuous.

Leadville district is maintaining a heavy tonnage production, with values averaging fair. The 1908 output will equal that for 1977.

The Empire Railway, Mining and Milling Company, capitalization \$5,000,000, has been incorporated, with E. M. Sabin president and W. E. Hogel secretary-treasurer, to build a road west from Empire through the Daily mining district over the Continental divide into Grande county to connect with the Moffat read at or near Frazer; also a line through Montesuma and Breckenridge to Leadville to connect with the Denver and Rio Grande and other lines, and east from Empire through Montesuma and Breckenridge to Leadville to connect with the Denver and Rio Grande and other lines, and east from Empire through Montesums and Breckenridge to Leadville to connect with the Denver and Rio Grande and other lines, and east from Empire through Montesums and Breckenridge to Leadville to connect with the Denver and Rio Grande and other lines, and east from Empire through Montesums and Breckenridge to Leadville to connect with the Denver and Rio Grande and other lines, and east from Empire through Montesums and Breckenridge to Leadville to connect with the Denver and Rio Grande and other lines, and east from Empire through Montesums and Breckenridge to Leadville to connect with the Denver and Rio Grande and other lines, and

will enfer the field as a result of competition. Cripple Creek production has been enhanced by the Golden Cycle mill. Other districts will be similarly benefited.

Silve Lake July 1973.

Silve Lake July 21 - The Jumbo Gypeum of significant in Seven proposition and silve lead of the silver-lead ore. Washington and for the building of a Keene cement plant of 100 tons dealy capacity from which the scorts say the graym makes an admirable Keene cement. It was at first intended to transform it into pleater of parts, but cement is made to the development of its Utah properties. after running four years, during which the Tyrags took out about \$500,000. They will now open the Texan group of twelve claims adjoining the Miliar.

On July 24, pioneer day, Jesse Knight's new smetter at Silver City, in the Trintic district, was dedicated by President Joseph F. Smith of the Mormon Church in the presence of a crowd of excursionists numbering 6,000. The plant is not yet in commission and the smelting of ore will not begin for several weeks. Considerable ore has been delivered at the works, but no suiphide ore, and the roaster plant is not ready for operation. The lead blast furnaces are completed lacking only the water and air blast connections. The electric siag train service has not been installed, though all the equipment is on the ground. The buillion house is not ready. The copper furnace building is up and a part of the work of building the furnaces is done. It is not believed that the two feed furnaces will be in full operation before the end of August.

MICHIGAN.

CALUMET, Aug. 1.—Another diamond drill was placed in commission at the Mass Consolidated Mining Company's property in Ontonagon counsy this week. It is reported that the lode being opened at the Lake Copper Company's property has been encountered, on the Mass and that the additional drill will be used for exploration before development work is undertaken from the surface. Several promising cuprifierous measures have been penetrated in the drill holes and it is understood that a promising lode has been opened at the Lake, supposed to be the Baltic. Theodore O. Nicholson, J. W. Linnell, Jr., and W. A. Bancroft, the executive commistee of the Mass directorate, have returned to Boston after a week at the mine.

Four new diamond drill locations have been established in Ontonagon caunty in the last few days. One of these is at the Victoria. Successive holes will be opened until the entire territory to the northern boundary is mapped.

At the Michigan a new diamond drill is MICHIGAN.

entire territory to the northern boundary is mapped.

At the Michigan a new diamond drill is located in a large area of rock at a point approximately 400 feet south of the Chicago, Milwaukee and St. Paul Railway tracks. It is believed that the hole started at this point will enter the lode opened at the Mass and Lake mines at a depth of 300 feet.

At the Adventure a diamond drill has been rigged up on the surface in such a position that the hole will penetrate the lode in the same vertical place as the previous one but a great deal nearer the surface. It is figured that the hole will pass through the lode at a depth of approximately 600 feet.

SOUTH DAKOTA.

DEADWOOD, July 26.—There is more mining activity in the Tinton country northwest of here than for a score of years back. The Tinton Reduction Company has 1,500 acres of patented ground, a small portion of which is over the Wyoming State line and the rest near the old Mallory placer diggings. A large ledge is supplying the mill with twenty tons daily. This product will be shipped to Liverpool, England, for the present, and later to Pittsburg. While the principal product of the mine is tin, some gold is present.

One of the most promising preperties in the Rochford district, south of this city, is the Balkan Mining Company's ground. This is owned by South Chicago people, Austrians. The milling plant will be completed for a test run neat month. The ore body shows assays ranging from \$2.80 to \$34.40 gold and \$3.00 silver.

Supt. Joe Keller is running several hundred feet of tunnel on the Gold Eagle property in the Mattland district and has also saired to sink a new 200 foot shaft. In the upper tunnel, which is in seventy feet, the ore body is thirty feet wide.

One of the older companies figuring on resuming work soon is the Titanic. An electric company has strung poles nearly to the hoist, which would permit of much cheaper operation than formerly.

Hill City, July 30.—Mining in this section is at present unusually active and more properties are working than for several summers past.

erties are working than for several summers past.

There will soon be a resumption on the property of the Coiden Metal Company, three miles east of here. This company recently took over the Mill City Electric Power and Mining Company and expects soon to begin the erection of an electric power plant which will cost in the neighborhood of \$50,000.

The Golden Slipper has just opened up another new one body that promises to be even better than the old vein. The average run of the new vein, it is said, will be better than \$50 per ton. IDAHO.

Boiss. July 29.—A six inch vein of galena ore high grade in silver has been out in the West Dewey mine, near Halley Hot Springs. Twenty years ago much ore was shipped from the mine, but a break in the vein caused it to become lost. The present owners have spent years and money drifting to find it.

A representative of the Gold Hill and Iowa companies is now at Quartzburg making arrangements for the resumption of both properties. The Gold Hill is equipped with powerful holsting works, pumps and twenty-live stamp mills, while the Iowa has a twenty-stamp mill.

G. W. Boggs, general manager of the Copper

that have wonderful showings in gold, suver and lead at the surface have gone out to inaugurate development work. One galena vein that is also rich in silver is over 100 feet in width and has been traced along the surface for two or three miles. The property is under bond to C. B. Steunenberg and W. H. Taylor. The Spofford Mining Company has broken a big body of low grade sulphide gold ore in Claim No. 5, five miles northeast of Boise. On the surface the ledge shows a width of 92 feet and the average of all the assays made shows a value of \$7.13 per ton.

Spring Mountain silver-lead district in the southeast corner of Lemhi, which is now coming to the front, is an old neglected district that has lain practically dormant for over twenty years. The machinery for a smelter of 300 tons daily capacity has been ordered.

The Blue Bird has an open cut showing a vein thirty feet wide of a good grade of lead ore, so good that most of it can be shipped seventy-five miles by wagons, sent to Balt Lake by rail and smelted at a good profit.

The Spring Mountain Mining Company, Ltd., has been organized here and has taken over ground of the Stolle holdings. A railroad has been surveyed from Armstadt, Mon., to the district.

The Seafoam Mining district in Custer county is watching with interest developments in railroad building in this great mineral belt. A line has been cutting ties and plling them along the line ready for use beyond Cape Horn at the east end of Bear Valley. It is a part of the Boise-Butte line projected by the California, Nevada Idaho and Northern Railway.

The Greyhound, which is the principal company operating in this district, was the only one that kept at work through the panicky times of last winter, and now has eighteen men at work finishing up a road and preparing for the erection of a concentrator and buildings. The company owns a group of twelve and a half claims of rich silver-lead ore.

\*\*SEATTLE, July 25.—The Great Excelsior and the Post Lambert mines in the Mount Baker

## The Securities Corporation, Ltd. Mining Investments

Based on producing properties directly under our control. We make a specialty of the recurities of Guanajuato, "Mexico's Treasure House," the oldest and richest gold and silver mining district in Mexico.

40 Wall Street, New York.

Durango. These mines are owned by a syndicate of Torreon, Mexice, men.

The Santa Cruz district, about twenty miles west of the town of Cananea, State of Sonora, is the scene of great activity, caused by the Cananea, Yaqui River and Pacific Railroad reaching that place. It is now planned to erect a large smelter there. A number of American mining companies are observating.

operating.

The Pacific Copper Company is preparing to build a standard gauge railroad from its mines near Real de Guadalupe. State of Guerrero, to the Pacific port of Zihuatinejo, a distance of twenty-eight miles. There are a number of foreign companies operating in the Real de Guadalupe district.

The Tri-State Development Company, which is composed principally of the English stockholders of the Kansas City, Mexico and Orient Railroad, is to install a great hydrociectric plant on the Fuertuffver in the Sierra Madres. State of Sinaloa. The object will be to supply power for several mining camps of that region, including Urique and Liuvia de Oro.

The Guanajuato Amalgamated Gold Mines. Company has encountered milling ore in the bottom of the shaft which it is sinking upon its Jesus Maria mine in the Guanajuato district.

The new fifty ton mill and concentrating plant of John J. Waterson and John J. Claque at Uruachic, State of Chihuahua, are ready to be placed in operation. The Can Martin mine, which they own, is a rich producer and contains ore already blocked out. They have a twenty-five ton reverberatory furnace in operation.

The Compania Miners Topo Grande, which operates a mine on Topo Chicp Mountain, near Montercy, is said to have uncorresed a large body of good shipping ore. The company's trying to acquire a number of adjacent chaims.

Searvice. July 25.—An arrival from the

SEATTLE, July 25.—An arrival from the Circle district brings word that a strike has been made on Salchacket Creek; forty miles from the mouth of Woodchopper Creek, by men from Fairbanks. One is known as B. Skip Sigh. "Pete the Pig" is reported to have made a good find on a tributary to Salchacket. The others are said to have six feet of two cent dirt. They whipsa wed lumber for the sluice boxes. The pay was eighteen miles from the timber land at a aigh elevation. The sawing was done in the timber and the lumber was freighted to the chains with dog teams.

A great body of pay has been developed on Discovery claim on Black Hills Creek. The pay streak there has proved to be 110 feet wide, and the miners have not run out of the pay on either limit. There is no telling how much wider is will prove to be. The pay gravel is six feet deep. The depth to bedrock is sixteen feet.

Many steam plants and open out propeditions are working on Black Hills and large fumes are carrying water to the various claims.

BRITISH COLUMBIA. BRITISH COLUMBIA.

BRATTLE, July 25.—Ore production in the Boundary and Koetenai districts is picking up with weaderful rapidity as idle properties resume. Last week the total shipments aggregated 43,773 tons, and the smalters at the same time treated 44,597 tons.

New discoveries have been made in the Ymir district, one of the most important of which is the epening of a large body of ere in the Second Relief mine. This, following the remarkable development in the Sheep Creek valley, has caused renewed interest in the development of both sections.

The Brooklyn mine, one of the properties of the Dominion Copper Company, on which a strike was made a few days ago, has the best gold values of any mine in the Phamix camp. The ore recently encountered runs from 84,60 to \$4.60 in gold to the ton.

shipped from the mine, but a brask in the vein caused it to become lost. The present owners have spent years and money drifting to find it.

A representative of the Gold Hill and Iowa companies is now at Quartzburg making arrangements for the resumption of both properties. The Gold Hill is equipped with powerful hoisting works, pumps and twenty in the properties. The Gold Hill is equipped with powerful hoisting works, pumps and twenty it amp mill.

G. W. Boggs, general manager of the Copper Butte Mining Company, operating in the Seven Devils country, is now shipping ore to Salt Lake and Taooma smelters, and is prepared to furnish them with 600 tons per month.

Owners of several prospects at Deadwood that have wonderful showings in gold, silver and lead at the surface have gone out to inaugurate development work. One galena vein that is also rich in silver is over 100 fees in width and has been traced along the surface have gone out to inaugurate development work. Note Syndicate, Delane Says.

CHICAGO, Aug. 2.-F. A. Delano, who was president of the Wheeling and Lake Eric until the appointment of a receiver, returned last night from New York, where he attended the conferences at which arrangements were made for taking care of

rangements were made for taking care of the \$8,000,000 notes of the road which are now falling due and are guaranteed by the Wabash. Mr. Delano said:

"The syndicate is made up of Blair & Co., Kuhn, Loeb & Co. and Mr. Gould. It is my understanding that Mr. Gould takes \$2,000,000 of the obligation, but what proportion of the remainder is taken by the individual banking firms I do not know. The only condition that I am aware of was with respect to the security for the loan. The syndicate gets \$12,000,000 worth of Lake Erie bonds. The syndicate puts itself in the position of the Wabash, and the transaction is in effect the purchase of the \$12,000,000 bonds for \$8,000,000."

Sheet and Tin Plate Plant to Resume Operations To-day.

Peressure, Aug. 2.-After being idle for about nine months the Leechburg plant of the American Sheet and Tin Plate Company will resume operations to-morrow pany will resume operations to-morrow and about 400 men will return to work. The company's plant at Vandergrift has been kept running steadily. It also is announced that the company's mines in the vicinity of West Leephburg, which have not been running for some time, will be started up again to-morrow.

The reorganization of the Virginia Passenger and Power Company, the Richmond ger and Power Company, the Richmond
Passenger and Power Company, the Richmond Traction Company and controlled lines
has been undertaken by a committee, consisting of Douglas Robinson of New York,
chairman; Frank J. Gould o

Carter, Ludyard & Milburn, consulting counsel.

The committee has prepared a plan of reorganization which has been deposited with the Bowling Green Trust Company as depositary, and requests the holders of the various securities affected by the reorganization to obtain the plan and depositheir securities under it before September 3. The protective committee of the Richmend Passenger and Power Company consolidated bencholders and a similar protective committee representing the South Bide Railway and Development Company's bondholders have approved the plan of reorganization.

ATLANTIC AVE. SURFACE CARS

Asserts Not Only That It Has the Right to Use the Surface but That Property Owners Are Almost Unanimous in Be-

The Long Island Railroad has applied to the Public Service Commission for its approval of the grant of a franchise to lay Flatbush and Shepard avenues. The com-pany claims a right of way through Atlantic avenue, but explains in the application that it is asking for a franchise for the reason that it does not wish to enter into litigation with the city. The company's claim to the right of way is based on its purchase of the rights of the old Brooklyn and Jamaica Railroad Company, which operated a sur-face line through Atlantic avenue:

The application of the company will undoubtedly be opposed, but the company seerts that while it conformed to the act surface. It is stated, in fact, that in accoding to the demands of the municipal authorities for the improvement of Atlantic avenue it was expressly provided that the company

ities for the improvement of Atlantic avenue it was expressly provided that the company "would have the right to use such surface for a passenger railway to be operated by electricity upon obtaining the consent of the local authorities and of the property holders."

The company states that while it is true that the city contributed \$1,250,000 toward the cost of the improvement the company expended for the same purpose \$8,500,000, or six times as much. The company expended \$250,000 in laying tracks and conduits in Atlantic avenue for surface trolley cars, but was prevented from operating the tracks by a decision of the Appellate Division, which beld that it was the intention of the Atlantic avenue improvement act to remove all surface tracks from the avenue. The contention is made by the company, however, that this decision did not affect the claims of the company that the right of way lying east and west of the part of the street acquired under the act was owned in fee by the railroad. While under the act the company commot operate a railroad in the centre of the avenue, it contends that it still has the right to lay tracks along the sides of the avenue. The application continues:

The subway from Manhattan to Flathush avenue has been opened for travel and affords a new and important means of access from the latter to the former. The only existing stations between Shepherd avenue and Flatbush avenue and Railroad Company in Atlantic avenue are at Nostrand avenue and Warwick street on the elevated structures. More cannot be constructed without interfering with the passage of the rapid through trains and the freight traffic of the Long Island Railroad Company over the improvement, and these frequent heavy trains also prevent its being used for local transis. The only means of access therefore to the subway terminal at Flatbush avenue by those residing or doing business in or near leaving the cars of the Long Island at its axisting stations can be carried to points on There is also no way by which passengers leaving the cars of the Long Island at its ex-Atlantic avenue near their homes. Consequently there has been an almost unanimou emand made upon the Long Island Rails Company by these property owners that the surface railroad, for which permission is asked in this proceeding, should be constructed to replace the local transit on Atlantic avenue, which was taken away, as above mentioned,, and which was contemplated by

The legal complications arising out of the numerous and grave, and many years of litigation must elapse before they can be adjusted. The only way in which this can be accomplished at the present time is by uniting in one corporation the rights of the Long Island Railroad Company, as lesses, with the grant of a franchise issued upon the theory, claimed by the city and certain of the property holders, that the surface of this

itigation with the city, and desires to comply with the wishes of the property holders. It therefore, without prejudice to its legal rights, applies for this franchise, believing that it will afford a solution of the present complicated situation, which will be of great benefit to the public, enhance the value of all the property in and adjacent to Atlantic avenue, and avoid the inconvenience, delay and expense arising from the prosecution of the existing litigation and the institution of other actions.

POLICEMAN KILLED BY A FALL. Alexander Mains, Suffering From Vertigo,

Tumbles Down Stairs. Policeman Alexander Mains, who was attached to the Borough Hall station in Brooklyn, was killed early yesterday morning by falling down stairs while suffering from a sudden attack of vertigo at his home 855 Herkimer street. He was unconscious s55 Herkimer street. He was unconscious and bleeding from a severe gash on the head when picked up and died before the arrival of Ambulance Surgeon Squires from St. John's Hospital.

Mains had been on detail duty in the Adams street court for the past year and after getting through with his court work on Saturday was sent on extra duty to Bergen Beach. He was much exhausted when he reached home after midnight and two hours later had the attack of vertigo. He was in his fifty-sixth year and had served thirty-two years on the force.

MAY LOSE JAPANESE TRADE.

VICTORIA, B. C., Aug. 2.- News arrived here to-day by the steamship Canfa that Japanese shippers, particularly those enraged in the porcelain and curio trade, will

gaged in the porcelain and curio trade, will be obliged to abandon shipments by direct steamships to the United States if rates are increased in consequence of the ruling of the Interstate Commerce Commission to be enforced on November 1.

The Japan Meil says a great effort has been made by the Nippon Yusen Kalsh and others to induce American railway companies to reconsider the proposed changes, and assurances have been telegraphed from Chicago that every effort will be made to arrange a satisfactory freight schedule.
